

Accessing the Lab Environment

In this lab, you are granted access to an AWS Account and a Wiz Tenant. Use the following steps to sign in to each account and verify that you have proper access.

Sign in to the AWS Console

1. Open a new private browsing or incognito window in your web browser.

Tip

Using a private browsing session ensures that any other AWS Console sessions that you might have cached do not interfere with the lab and vice versa.

2. In the private browsing window, navigate to the following URL: .

3. On the **IAM user sign in** page, enter the following:

- For **IAM username**, enter .
- For **Password**, enter .

You should now have access to the AWS Management Console.

Sign in to the Wiz portal

4. Open a new tab in your private browsing or incognito window.

Tip

Using a private browsing session ensures that any other Wiz portal sessions that you might have cached do not interfere with the lab and vice versa.

5. Navigate to the following URL: .

6. On the **Sign in** page, enter the following username: .

7. On the **Enter password** page, enter the following: .

 Wiz portal sign in Enter Password page

8. Click **Sign in**.

9. If you see a **Stay signed in?** page, click **No**.

10. If you see a **What is your primary focus** pop-up window, keep the default **I manage all aspects of security** option and click **Done**.

Tip

To learn more about *Lens*, refer to [Lens](#) in Wiz Docs.

 Wiz Lens prompt at first sign in

You should now have access to the Wiz portal.

 Wiz portal home page

11. At the upper-right corner of the page, click the **User** icon and verify that you are signed in as the following user: .
